

Waste & sustainability workshops for K - Yr 6

Dubbo Regional Council, Mid-Western Regional Council and Narromine Shire Council offer engaging syllabus linked waste and sustainability workshops for years K-6 at no cost to schools.

The workshops aim to engage students with real world experiences on topics of litter, recycling and food waste and broader understandings of sustainability.

Sustainability education provides important opportunities for students to become engaged in real world issues that transcend classroom walls. They can see the relevance of their classroom studies to the complex environmental issues confronting our planet and they can acquire the skills they'll need to be creative problem solvers and powerful advocates.

Curriculum based school programs

COST:

FREE for all schools in the Dubbo Regional, Mid-Western Regional and Narromine Shire Council areas

DATES:

Dates available throughout Terms 3 and 4 2024.

There is a limited number of spots available so please book as early as possible.

Registration for the program is required by the end of Term 1, 28 March 2024.

To find out more please contact the Resource Recovery Education Officer.

Bookings close: End of
Term 1 : Thursday 28
March 2024

Years K - 2

Syllabus linked Outcomes and Learning Intentions **FIGHT AGAINST FOOD WASTE**

STUDENTS WILL:

- Develop an understanding of what food waste is and the environmental and social effects of food waste
- Explore solutions to food waste which benefit people and the environment

OUTCOMES:

- GE3-2 explains interactions and connections between people, places and environments
- GE3-3 compares and contrasts influences on the management of places and environments

Years 3 & 4

Syllabus linked Outcomes and Learning Intentions

LITTLE LITTER SUPERHEROES

STUDENTS WILL:

- Learn about what litter is, where it comes from and why it is harmful to the environment, animals and people
- Understand ways to reduce and address littering

OUTCOMES:

- GE2-2 describes the ways people, places and environments interact
- GE2-3 examines differing perceptions about the management of places and environments
- ST2-16P describes how products are designed and produced, and the ways people use them

Years 5 & 6

Syllabus linked Outcomes and Learning Intentions

RECYCLE RIGHT TOGETHER

STUDENTS WILL:

- Learn about different waste management approaches and systems (linear- landfill and more circular- recycling and reuse) and impacts on places and the environment
- Gain greater understanding of the recycling process and the role they play in it
- Identify commonly recyclable materials

OUTCOMES:

- GE2-2 describes the ways people, places and environments interact
 - GE2-3 examines differing perceptions about the management of places and environments
 - ST2-16P describes how products are designed and produced, and the ways people use them
